

Zinc Combination Couplings

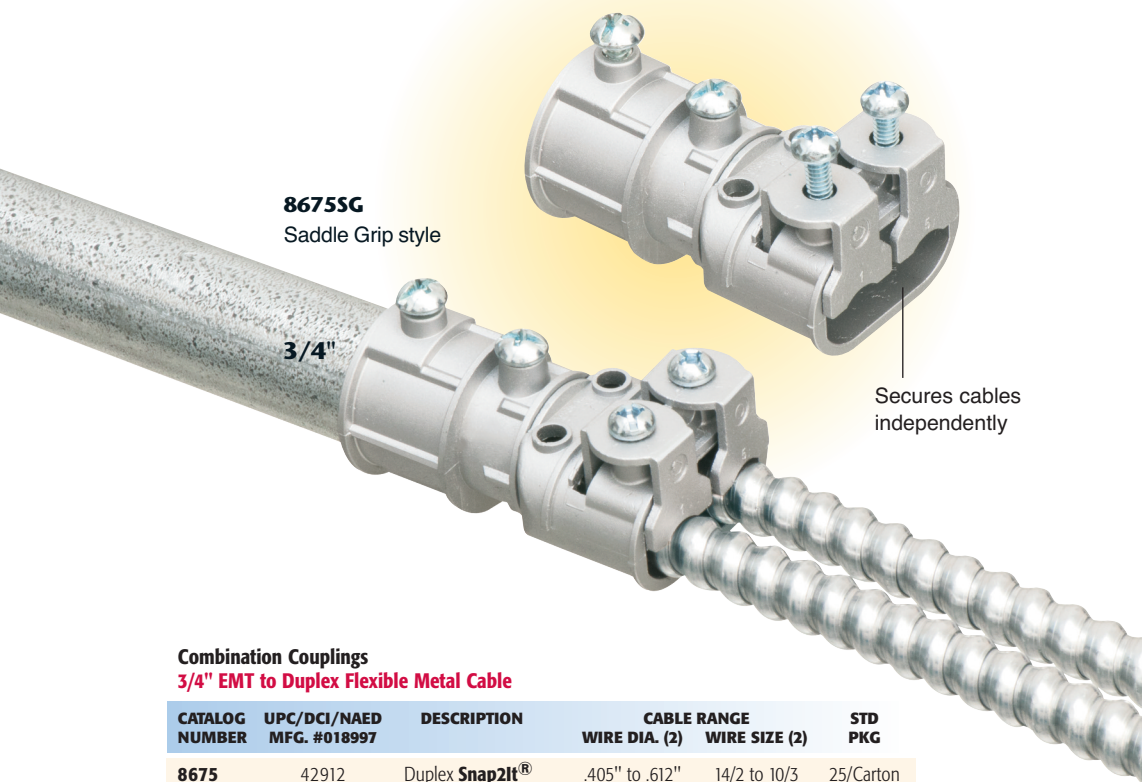

Made in USA 

NEW!

EMT to Duplex Flexible Metal Cable • Easy to Install

EASY, VERSATILE INSTALLATION!
Snap²It[®] or SADDLE GRIP[®] Styles

Arlington's newest duplex zinc diecast couplings save time and money by allowing an installer to easily transition from 3/4" EMT to 3/8" trade size flexible metal cables.

Available in Snap²It[®] and SADDLE GRIP[®] styles, they're perfect, for example, for running MC cable above a drop ceiling and connecting to *surface mounted* EMT to feed a box or switch.

Here's the answer to jobsite flexibility!

8675 and **8675SG** combination couplings offer easy installation on AC, MCI-A, HCF steel and aluminum cable, flexible metal conduit (steel and aluminum, regular and reduced wall), MCI cable and continuous corrugated aluminum.

These duplex couplings are tested and listed to exceed UL ground fault requirements. And offer independent securing of different size cables.

- Compatible with 3/4" EMT
- **Ships Assembled** – ready to use
- UL Listed

Patent pending
