Cable Entry Bracket with Slotted Cover

Installs FAST with a hole saw • Non-metallic

CE1RP
Cable Entry Bracket
w/ slotted
cover

NEW!

Arlington's heavy-duty, super-sturdy **CE1RP** Cable Entry Bracket is the fastest way to install a bundle of Class 2 low voltage wiring. Our new entry bracket installs quickly and easily with a 3.5" hole saw, saving time and money.

Its reinforced, slotted cover holds a larger bundle of low voltage cable secure and allows the pass-through of even the largest HDMI connectors.

When tightened, mounting wing screws hold the bracket securely against the wall. You can level or straighten the CE1RP by rotating it, then tightening the screws.

- Installs with a 3.5" hole saw in less than a minute
- Adjusts to fit 1/4" to 1-1/2" wall thicknesses

Check out the new CE1RP, and our entire line of time-saving low voltage mounting brackets.

CE1RP Cable Entry Bracket

NEW!

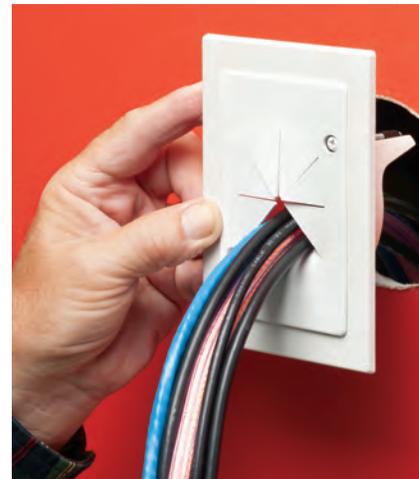

Non-metallic • Handles larger bundles of low voltage cable

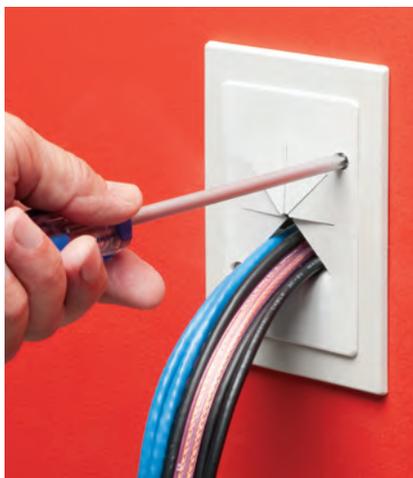

Determine bracket position. Cut opening with a 3.5" hole saw.

Pull cable...

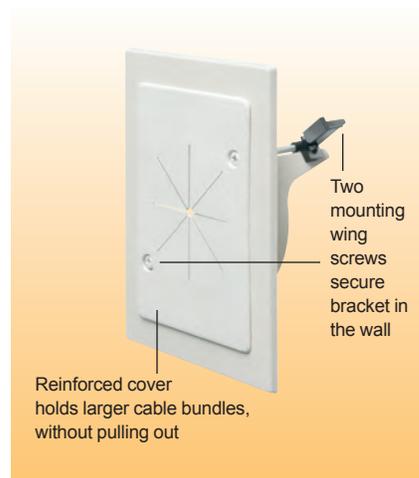

...through the slotted opening in CE1RP. Insert into hole. Level, straighten the bracket.

Tighten the two mounting wing screws to pull the CE1RP securely against the wall board.

Completed installation.
