

Heavy-duty Plated Steel **FAN•FIXTURE BOX**

with fully adjustable bracket to fit wood I-joists in existing construction

Photo cut away
to show installation
between I-beams

Arlington's new fan/fixture box is perfect for installations on wood I-beams. For a secure, UL-rated installation there's nothing better.

Installation is fast and easy, and you can position the box anywhere along the bracket to center the fan or fixture in the room.

- For 1/2" and 5/8" ceiling thicknesses
- No parts to lose – FBRS407R ships with captive box adjustment screws, fan bracket installation screws and an installed NM cable connector
- 8.0 cubic inch box
- For existing construction on wood I-beams or rafters set 16 to 24 inches on-center

UL rating 35 lb fan • 50 lb fixture
