Plated Steel Fan/Fixture Box for New Work

Adjustable Mounting Bracket • Versatile On-Center Positioning

Arlington’s plated steel box, with adjustable bracket, mounts fans/fixtures easily and securely between joists spaced 16 inches to 24 inches on center.

Designed for flush installation on ceilings up to 1-1/4” thick, FBRS415 ships ready to install on a 1/2” ceiling. For other ceiling thicknesses simply bend the bracket along the pre-scored line for 3/4”, 1” or 1-1/4” ceiling depth.

Here’s the innovative, heavy-duty alternative to bar hanger brackets that eliminates the fan wobble you can get with lighter products.

• UL/CSA Listed

Adjustable Bracket Length
Mounts between joists spaced 16” to 24” on center

UL rated
70 lb fan, 90 lb fixture at 24” o.c.
70 lb fan, 150 lb fixture at 16” o.c.

Flush to ceiling installation • Self-contained, no loose parts
FBRS415 Plated Steel Fan/Fixture Box for New Work

Adjusts to fit between joists spaced 16 to 24 inches on center

1 FBR415 ships ready to install with a 1/2" thick ceiling. For a deeper ceiling bend bracket ends along the appropriate score lines as shown at right. Tap in "tooth" on each end to hold bracket temporarily in place on joist/rafter.

2 Remove screws from each side of bracket. Use them to attach bracket to joists.

3 Position box in desired position along joist.

4 Install mounting bracket with supplied screws.

FBRS415 Patented

UL 70 lb Fan, 150 lb Fixture
CSA 50 lb Fan or Fixture

Ships with mud cover in place, captive installation screws, installed NM cable connector.
