Arlington’s FLOOR BOXES, COVER KITS, and accessories FOR NEW CONCRETE are the low cost, convenient way to install a receptacle flush with a new floor.

Made of heavy-duty plastic, our NEW FLBC4502 4.5” non-metallic concrete floor box has more – SIX conduit hubs and FOUR plugs. And THREE options for positioning the low voltage divider in the box.

The NEW FLBC4502LR leveling ring makes installing a cover easy on ANY 4.5” concrete box including our FLBC4500 and the new FLBC4502. It’s REVERSIBLE! Side A fits any 6” round cover with a 3-1/2” screw hole pattern. Side B has a second set of holes that fits 6” covers with a 3-3/8” screw hole pattern.

Arlington offers a variety of cover kits to fit our concrete boxes – Round with flip lids or threaded plugs in brass or nickel-plated brass. Metal trapdoor covers with three device options. And in plastic, in six colors.

Get a great-looking, time-saving receptacle installation in new concrete with floor box kits, covers and more - from Arlington!

**EASY TO INSTALL CONCRETE BOXES**

1. Set concrete floor box into position. Secure in place through molded mounting ears. Option: Use 1/4-20 screws to level/position the box.
2. Install conduit as needed using PVC cement. Pull wires through conduit as required.
3. Install plugs (provided) w/ PVC cement to seal unused openings.
4. Install pour cap. Pour concrete to finished depth.
5. After concrete has cured, remove pour cap. Use a saw to cut box to finished floor height.

Complete the installation with a leveling ring and one of these cover trim kits.
