IN BOX™ Floor Box Kit with Recessed Wiring Device

For Existing Floors • TWO Low Voltage Ports • Listed Receptacle

Arlington’s FLBR5420 series RECESSED FLOOR BOX KITS offer great new features, like two low voltage openings, an ultra-thin stamped steel flange, and flush-to-the-floor in-use and blank covers. Here’s the solution for cost-savings and easy installation of a receptacle and low voltage connections in an existing, hard surface floor.

Because the flange is ultra thin and the wiring device is recessed, these floor boxes reduce the trip hazard caused by plugs protruding from the box.

You can also have power and now TWO low voltage openings, without the need for a divider, in the same box. That’s convenience!

Installation is quick and easy with a 5” hole saw. Four mounting wing screws attach the 24.5 cubic inch box securely to the floor.

• cULus Listed 20A tamper-resistant decorator-style receptacle.

• Covers: SIX finishes/colors
  - Metal in brass-plated, nickel-plated and antique bronze-plated zinc.
  - And powder-coated diecast zinc in black, brown and light almond.

Installs with Hole Saw in Existing Floors

**EASY INSTALLATION**

1. Determine location for the floor box installation (avoid structural framing members). Use a hole saw, to cut a 5" diameter hole through flooring and subfloor.
3. Install (4) cover plate screws to secure box to floor flange assembly. Install low voltage devices into pre-installed LV keystone holder if desired (or use keystone blank inserts).
4. Low voltage tie-off brackets may be installed to back of box with supplied #6 x 1/2" screws. Use cable tie (not supplied) to attach low voltage cables if desired.
5. For wood, tile, or any hard surface floors, add caulking as required under flange to seal off at floor.
6. Place FLBR5420 Floor Box into hole. Orient the box to suit installation. Tighten four wing screws to secure box to the floor.

**FLBR5420 KITS INCLUDE**

24.5 cu. inch non-metallic recessed box, cULus Listed, tamper resistant 20A decorator-style receptacle, (2) installed/low voltage keystone holder inserts, (2) blank inserts, blank cover w/gasket, in-use slotted plug cover, (3) #8x5/8" flat head screws, (1) NM cable connector, (2) low voltage tie-off brackets, (2) #8x1/2" sheet metal screws.
