Non-metallic Hole Cover Kits

Ensures compliance with OSHA • Rated for 250 lb load

The smallest cover, HC1742, fits a 1-3/4" to 4-1/4" hole.

HC1762 fits a 1-3/4" to 6-1/4" opening.

HC3792, our 10.5" diameter cover, fits a 3-3/4" to 9-1/4" hole.

For small holes, under 2-1/2" diameter, position the longer leg of the retaining clip toward the outside edge of the cover.

HC1742
set for
1-3/4" hole

Patent pending

For holes larger than 2-1/2", position the longer part of the clip towards the center of the cover.

HC1762
set for
6" hole

Arlington's non-metallic hole cover kits offer the *fastest* way to cover a hole – and ensure compliance with OSHA safety standards on a multi-story building site.

Available in THREE sizes, covers come with retaining clips that allow for adjustment to fit a range of hole sizes. The reference scale on the underside of the cover allows for precise sizing to the hole diameter.

(underside)

- Complies with OSHA Standard 1910.28 (b) (3) (i) (A)
- Rated for 250 lb load, tested at four times the rated load

Non-metallic Hole Cover Kits

Three sizes • Adjustable to fit a range of hole sizes

HC series Hole Covers
Easy to install

Measure the hole to be covered.
Using the size reference scale, attach the retaining clips to the underside of the cover with the supplied screws. See notes above for clip positioning.

Push the assembled hole cover into the hole and adjust the fit.
* If too loose, move one of the clips slightly outward.

When necessary, remove the cover with a flat blade screwdriver.
Note: Do not use these hole covers in areas with high vehicular traffic.

CATALOG NUMBER	UPC/DCI/NAED MFG. #018997	DESCRIPTION HOLE COVER KITS	UNIT PKG	STD PKG
HC1742	42913	fits 1-3/4" to 4-1/4" hole	1	20
