One-piece Steel MC Cable Hangers

Mount in Any Direction on Variety of Surfaces • Meets 2020 NEC

Hang Flex, MC, AC and HCF cables any which way with our one-piece galvanized SMC series steel cable hangers. They mount on a variety of surfaces in any direction.

Available in three sizes, our SMC hangers are Listed to support and secure 14/2 to 10/4 cables – as required by NEC 300-30.

They are the best and most economical hangers in the industry to meet the requirements of NEC 300.4(E) – specifically the installation of flexible metal jacketed cable under corrugated metal roof decking. The outer surface of cables other than RIGID and IMC must be at least 1-1/2" (38 mm) from the surface of the roof decking. Our SMC hangers exceed this requirement, keeping cable away from the surface by more than 2".

SMC8 holds up to eight cables.
SMC4 holds up to four.
SMC4F mounts flat, holding up to four cables on one side of the hanger.

• Cost less than cable tray
• Secure installation with a screwdriver
• Mount SMC in any direction.
Suspend. Twist. Or stack.

Arlington’s steel SMC MC Cable hangers meet the requirements of NEC 300.4(E) for installing MC or AC metal jacketed cables under corrugated metal roof decking.

The outer surface of cable must be 1-1/2" from the underside of the decking. Our SMC Hangers exceed this requirement!
