

Low Profile TV BOX™ with Steel Back Box

for use with Metal Conduit • Installs in Shallow Walls

NEW!
Low Profile
5x8 TV BOX™
with
STEEL BACK
BOX

Arlington's new low profile 5x8 inch TV Box™ comes with a steel back box for use with metal conduit – and a 38RAST Snap2It® connector to complete the installation.

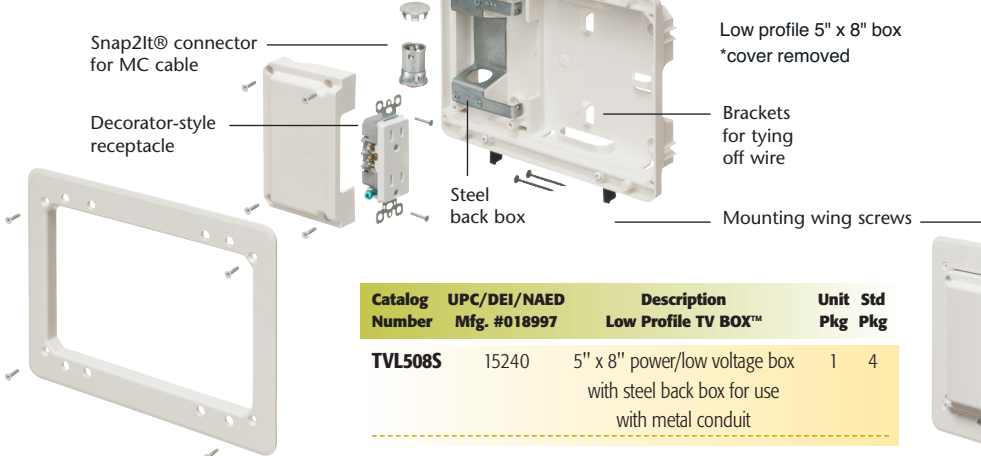

TVL508S is perfect for flush mounting TVs on a wall as shallow as 3/4" such as furring strips on concrete block walls or 2x2, 2x3 and 2x4 or larger studs.

The low profile design also helps compensate for plumbing and other obstructions present behind the wall. 1-1/4" depth

Plugs and connections stay inside the box so the TV mounts close to the wall. And there's ample room inside for tying off cable.

- Secure mounting in wall with mounting wing screws
- cULus Listed

Catalog Number	UPC/DEI/NAED Mfg. #018997	Description	Unit Pkg	Std Pkg
TVL508S	15240	5" x 8" power/low voltage box with steel back box for use with metal conduit	1	4
