

LISTED **BOX EXTENDERS**

Extend Set back Boxes
Up to 1-1/2"

FIRE-RATED • LEVELS, SUPPORTS WIRING DEVICES

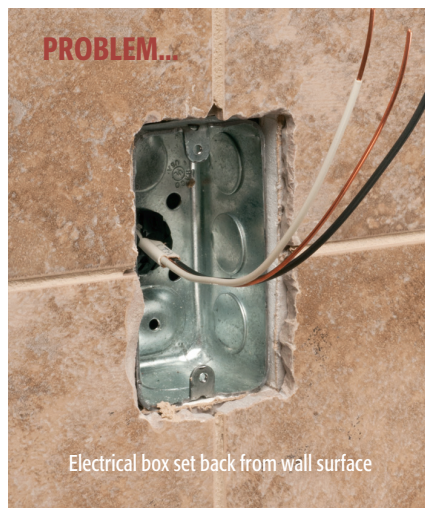

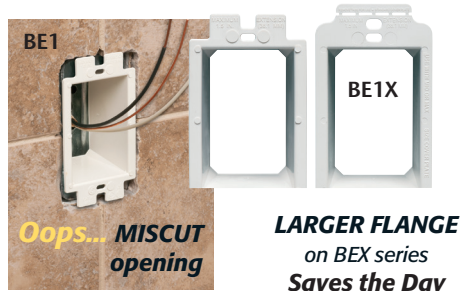

BOX EXTENDERS • Retrofit

Extend set back boxes up to 1-1/2" • Level, support wiring device

Arlington's **Listed BE series** non-metallic Box Extenders level and support wiring devices installed in set back boxes. They **extend set back boxes UP TO 1-1/2"**.

Available in two styles – one with larger flanges that provide better device support in oversized or miscut openings in the wall.

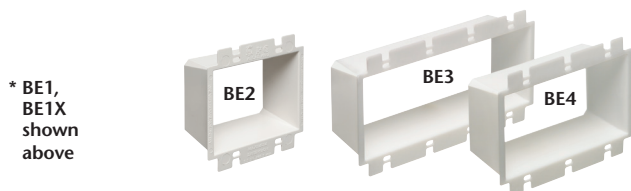

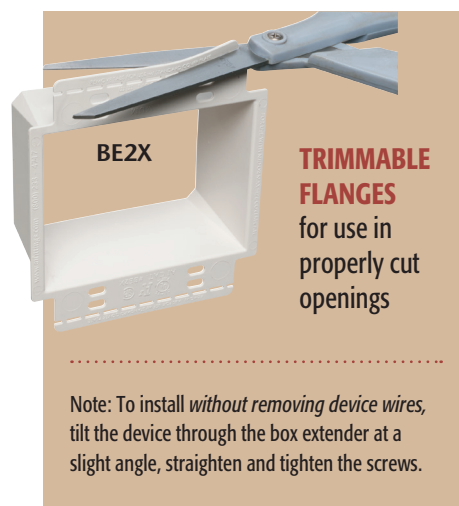

BE and BEX Box Extenders

- Allow compliance with NEC Article 314.20 for set back boxes
- Work in handy boxes and 4" square electrical boxes with plaster rings for single switches or receptacles
- Function with all standard devices, switches and GFCIs – *No taping sides of receptacle to prevent arcing in a metal box*

TWO HOUR FIRE RATING

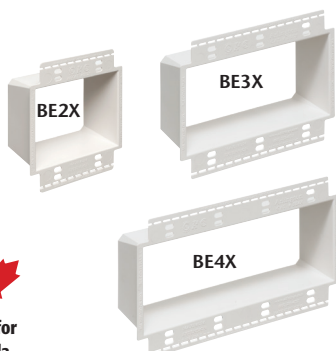

- **Safer installations** Manufactured from 105°C continuous use 94V0-rated flame retardant extra duty plastic

COMMERCIAL GRADE BOX EXTENDERS

Heavy-Duty •

Trimmable

Just like our BE and BEX series, Arlington's new **heavy-duty, commercial-grade** Box Extenders level and support wiring devices. They extend set back metallic and non-metallic electrical boxes up to 1-1/2". And protect wires against damage and stripping.

Our BE1XLS and BE2XLS are non-metallic box extenders with galvanized steel support plates. They work with maxi, midi and standard wall plates.

Convenience • Time-savings

Ready to use with a maxi cover plate, *great for hiding poorly cut drywall*. Use the guidelines to trim the device support plate for mid-size or standard wall plates.

TWO HOUR FIRE RATING

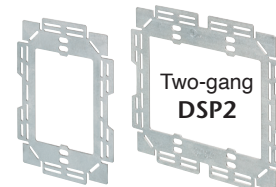

*If the edge of the box, plaster ring or box extender will be set back from the finished surface **LESS THAN 1/4"** use our Device Support Plates.*

- Easily solves the problem of poorly cut drywall – obtain a flush trim finish
- Galvanized steel support plates level and support wiring devices
- Trimmable as needed to fit Standard, Mid-size and Jumbo Wall Plates

SHALLOW BOX EXTENDER • Retrofit

Add 5/8" Height, Depth to a Box

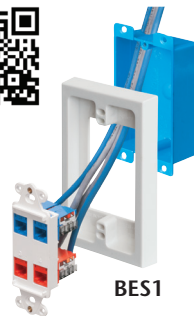

Add height *and* depth to a shallow electrical box – the easy way – with Arlington's **Listed BES series** non-metallic Box Extenders.

Fast and convenient, and perfect for installing a motion detector or low voltage device – or an outlet in the two-gang BES2. Attaching a **BES box extender** adds 5/8" of height to an installed shallow box without removing the box.

- **Enlarges box volume**
BES1 adds 5.3 cu. inches
 Two-piece **BES2 adds 10.5 cu. inches**
- Both accommodate standard or mid-size cover plates

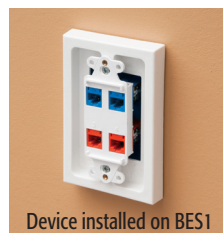

PATENTED

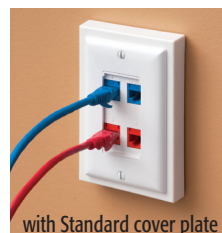

BES1

Installed shallow box

Device installed on BES1

with Standard cover plate

with Mid-size cover plate

Need more gangs?

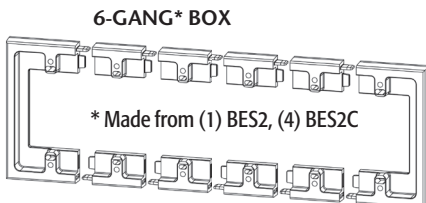

Add a coupler set.

Each adds one gang, and an additional 3.5 cu. inches of volume.

LISTED for UP TO a TEN-GANG Box!
